EDUCATION

Carnegie Mellon University

Bachelor of Science in Artificial Intelligence & Computer Science, minor in Business Analytics

Pittsburgh, PA

Aug 2024 - May 2028

- **Coursework:** ML, Gen AI, Probability, Imperative/Functional Programming, Distributed Systems, ML & Business Analytics
- **Cumulative GPA:** 3.5/4.0; **Clubs:** ScottyLabs (Innovation & Dev Team), Sports Analytics, Pickleball

WORK EXPERIENCES

AI Engineering Intern

Eton Solutions LP

May 2026 – Present

Morrisville, NC

- Building an end-to-end document intelligence workflow at a **\$1.4T AUM** wealth management and ERP firm; automating document classification and data extraction as part of a firm-wide data monetization initiative.
- Engineering an AI-powered pipeline integrating **REST/MCP** ingestion, Azure Document Intelligence extraction, and multi-provider LLM classification; built to scale up to **3.1M** financial documents of varying types.
- Projected to improve classification accuracy **15%** over native baseline and accelerate downstream data workflows

Software Engineering Intern

Arohi Asset Management

May 2025 – Aug 2025

Singapore, SG

- Developed a fully integrated multivariate regression optimizer to quantify crowding in financial markets
- Processed large scale datasets using pandas and SciPy, delivering a robust model estimating forward share price movement using **SLSQP** optimization and **OLS** multivariate regression
- Delivered actionable insights and improved idea generation by **10%**. Awarded **bonus letter** by founder at project completion.

Research Intern

Arohi Asset Management

May 2022 – Oct 2022

Singapore, SG

- Explored NLP techniques to extract sentiment signals from sell-side analyst reports, using regression analysis to investigate relationships between sentiment scores and share price movement.
- Designed backtesting experiments across multiple quarters to evaluate the feasibility of sentiment-based trading signals.

PROJECTS

OpenFolio (Portfolio Analytics & Insights) | TypeScript, React, MongoDB, Gemini API

May 2025 - Present

- Built a full-stack equity portfolio app with TypeScript/Express + MongoDB backend and React 18/Vite SPA featuring live Yahoo Finance quotes, Recharts dashboards, and CSV bulk import
- Integrated Gemini API for AI-powered portfolio analytics and ideation, with persistent report history and PDF export, delivering personalized capital analytics on real-time watchlist data

CMU Hive (Full-Stack Web Development) | ReactJS, NodeJS

Aug 2024 – Jun 2025

- Developed CMU Hive, a centralized hub with a custom overlay and interface giving CMU's **7,000+** undergraduates convenient access to university-related applications.
- Implemented the front end using **React.js** and **HTML**, handling all interface components and routing logic

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, HTML, CSS, VBA, SML, MongoDB

Tools: React.js, Node.js, Scikit-Learn, OpenCV, Azure

Frameworks: Git, TensorFlow, OpenCV, REST, Pandas, Pytorch, VSCode, PyCharm, Excel, MCP

EXTRACURRICULARS & LEADERSHIP

- **President**, Singapore Students' Association (2025-26); **Head Tutor**, PLUS Tutoring (2025-Present)
- **Corporal First Class**, Singapore Armed Forces; **Advanced Certified Diver**; **ABRSM Grade 5** Music Theory
