EDUCATION

NPS International School

Singapore

International Baccalaureate Diploma Program (IBDP)

July 2020 – May 2022

- IBDP Final Score: 45/45; Key Subjects: 7/7 in Mathematics, Physics, Economics, Computer Science

Carnegie Mellon University

Pittsburgh, Pennsylvania

Second Year Undergraduate, B.S. in Artificial Intelligence, Minor in Economics

Expected Grad: May 2027

TECHNICAL SKILLS

- Programming: Python, C, Java, SML, SQL; Data Science and Analytics: Scikit-Learn, Excel, VBA, OpenCV; Web Development: HTML, CSS, React.js, Node.js, Tools & Platforms: Git, VSCode, PyCharm

EXPERIENCES

Quantitative Finance Intern

Arohi Asset Management (May 2025 – August 2025)

- Developed a fully integrated multivariate regression optimizer to quantify *crowding* in financial markets, building on data from leading financial research (MSCI, Bernstein Research, UBS)
- Processed large scale data sets from FactSet and CapitalIQ using *pandas* and *SciPy*, delivering a robust model estimating forward share price movement
- Delivered actionable insights to investment team, awarded bonus upon project completion

Transport Operator, Corporal First Class

Singapore Armed Forces (October 2022 – August 2024)

- Used Excel VBA to automate sensitive data collection and manpower allocation within 100-man unit
- Developed and implemented infrastructure to track and forecast mileage for license conversion

Research Intern

Arohi Asset Management (May 2022 – October 2022)

- Explored NLP techniques to extract *sentiment* signals from sell-side analyst reports
- Conducted regression analysis to investigate relationships between sentiment scores and share price movement
- Designed and ran backtesting experiments across multiple quarters to evaluate the feasibility of sentiment-based trading signals

PROJECTS

Full-Stack Webpage Development

- Developed a web application *CMU Hive*, a centralized hub with a custom overlay and interface to allow the 7000+ undergraduate student body convenient access to university-related applications from one platform
- Implemented the front-end using React.js and HTML, handling all interface components and routing logic

Wireless IoT Image Capture and Retrieval System

- Contributed to CMU's annual *Booth* tradition by building a one-story wooden booth and developing a photo capture and QR-based download system using Raspberry Pi 5 with a Pi Zero for wireless signal extension
- Developed the back-end functionality using C, Python, and HTML to handle button-triggered POST requests, image capture, and system communication

COMMUNITY, EXTRACURRICULARS, AND LEADERSHIP

President, CMU Singapore Student's Association

April 2025 – Present

- Responsible for leading a 300+ member community of students while managing 10K in funding

Project Development Lead, ScottyLabs

August 2024 – Present

Electrical Team Leader, First Robotics Competition

November 2019 – January 2021

- Dean's List semifinalist, Rookie team won the *All-Star Award*
